

RUFFNECK® Heaters

We ship the heat in a week!

INDUSTRIAL HEATING SOLUTIONS

FX4
SERIES

Explosion-Proof Electric Forced-Air Heaters

The FX4 series of liquid filled heaters is CSA certified or UL listed for use in hazardous locations where explosive gases or dusts are present. FX4 forced-air heaters are approved for Groups C, D, E, F, G, IIA, & IIB hazardous locations. The unique, liquid filled, evacuated core produces a faster temperature rise and a more even heat distribution. FX4 heaters are available in 62 models ranging from 3.0 to 35 kW and include a 3-year warranty. An optional built-in thermostat and disconnect switch are available to reduce installation costs.

CX1
SERIES

Explosion-Proof Electric Convection-Air Heaters

The CX1 ProVector® series of convection heaters are UL & cUL approved for Groups B, C, D, IIA, & (IIB + H₂) hazardous locations and are available in 45 models ranging from 1.2 to 7.6 kW. Other features include a small, sloped-top cabinet for better space utilization and improved safety, incoloy 840 heating elements for longer life and increased reliability, and a high-velocity airflow for faster warm-up time and better heat distribution. An optional built-in thermostat is also available, on select models, to reduce installation costs.

CR1
SERIES

Corrosion-Resistant Electric Unit Heater

RUFFNECK's CR1 Triton™ series of corrosion-resistant forced air unit heaters are suitable for non-hazardous highly corrosive, humid or dirty environments and can be used in hose-down applications. These units are UL Listed Type 4X and are available in models from 3kW to 39kW. Options include a manual reset high-limit, built in T'stat, door interlocking disconnect switch, pilot light, 3-position fan switch and Monel® elements.

Ruffneck Heaters also has a variety of European models available.
